KNOWLEDGE ENABLED SOLUTION COMPONENTS STATE OF THE ART – VERSION 2

Executive Summary

This document reports on work completed up to M24 and describes the drivers, requirements, methodology and results thus far. This document is the second official deliverable for Task 3.1.2. The objective of this task is to identify and qualify, Knowledge Management solutions within the engineering domain, addressing issues identified during the use case analysis task.

The document has described how the work was progressed, and has identified, and described current results and how these link to task requirements, in particular:

- Produced a Knowledge Management Overview deliverable to orient the reader,
- Produced a common knowledge lifecycle,
- Classified knowledge-challenges,
- Identified solution components through a State-of-the-Art and leveraging of partner networks.
- Ranked components against Service Requirements for the common Integrated Platform.
