# **SPECIFICATION FOR PILOTS VERSION 1**

## **Executive Summary**

This document reports the work completed up to M24 by Task 3.1.4 and represents the first version of the specification for pilots. The document contains the definition of To-Be processes of Pilots, the analysis and harmonization of functional requirements and the first version of service requirements and implementation guidelines. These outputs will be used for the implementation of a common Knowledge Enabled Solution Platform and constitute a guideline for the piloting activities. The specifications will be revised and released as V2 after the first prototype implementation.
