

VIVACE – Solutions for the supply chain, & deployment - introduction.

VIVACE

Presenter, Patrick Williams - Assystem UK

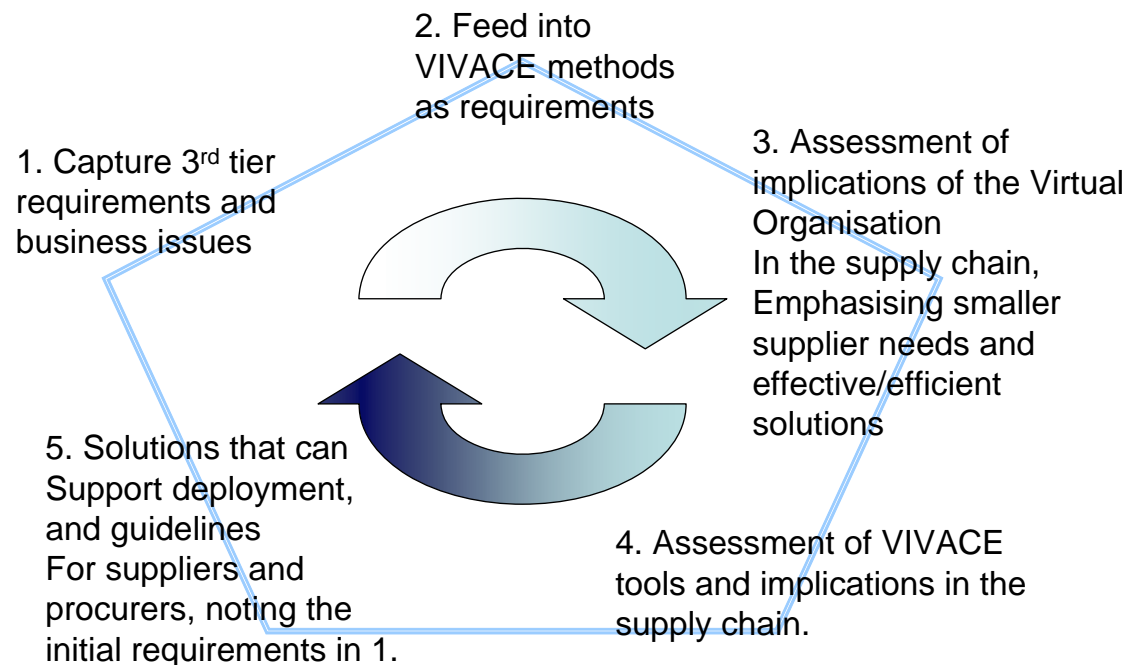

Introduction

This research has focused on the application of VIVACE with 3rd tier/smaller suppliers.

The results have provided results for consideration in the wider Aerospace supply chain, in deploying VIVACE techniques.

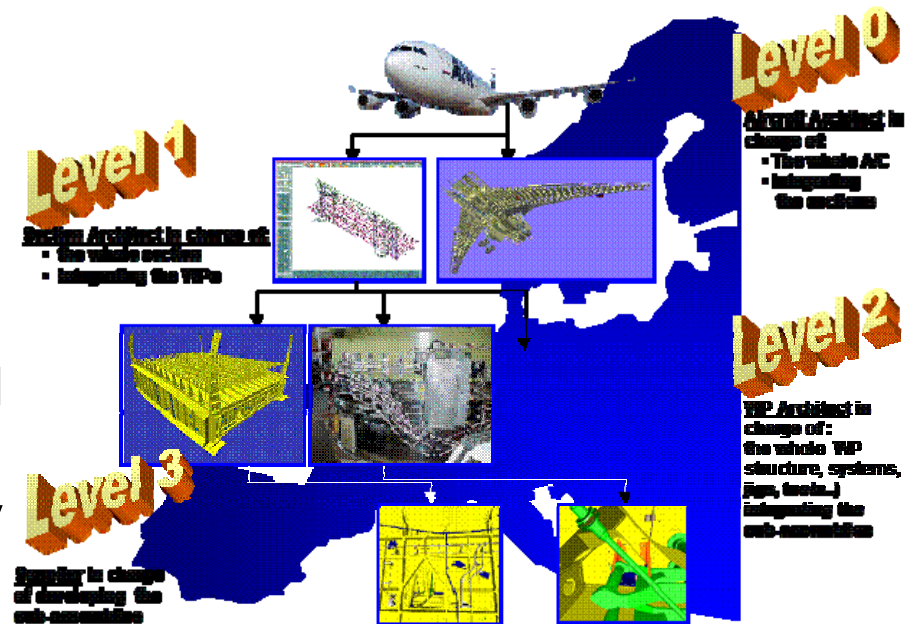

What we have done....

Introduction

The results from this work are :

1. An understanding of the issues for smaller suppliers which have been input to the main VIVACE methods work.
2. A range of results that can be applied to suppliers and Procurement functions at various levels of the supply chain.
3. Guidelines to assist organisations in progressing deployment of VIVACE methods, and the Virtual/Extended enterprise.

Services provided by smaller suppliers:

- Design and make.
- IT/Software and Methods Consultancy.
- Technical services.
- Production and logistics.

that can be provided to all levels.

Contents

Contents of this session...

Introduction – Patrick Williams, Assystem UK.

Requirements for smaller suppliers, noting relationship to other levels – Bruno Lisanti, ESOCE.

Virtual and Extended Enterprise solutions, with emphasis on effective approaches for the supply chain and smaller suppliers – Mats Lindeblad, Volvo Aero Corporation.

VIVACE Methods and guidelines for application in the supply chain.
Conclusions – Patrick Williams, Assystem UK.
